PROFESSIONAL SUMMARY

Motivated **Computer Science & Engineering** undergraduate with a solid academic foundation in **Data Science, Data Analysis, and Machine Learning**. Hands-on proficiency in **Python, SQL, Pandas, NumPy, Scikit-learn, Power BI, and Excel**, with practical project experience executing exploratory data analysis (EDA), feature engineering, statistical modeling, and deploying predictive ML applications. Dedicated to leveraging analytical, mathematical, and algorithmic capabilities to deliver actionable insights in an entry-level Data Analyst or Junior Data Scientist role.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science and Engineering **2023 – 2027**
College: KMBB College of Engineering & Technology, Khurda
University: Biju Patnaik University of Technology (BPUT) | Odisha, India

Higher Secondary Education (+2) **2021 – 2023**
College: Dr. Harekrishna Mahatab Higher Secondary School, Kupari
Board: Council of Higher Secondary Education (CHSE), Odisha

Matriculation (10th) **2020 – 2021**
School: Sakuntala Nodal High School, Jirital
Board: Board of Secondary Education (BSE), Odisha

TECHNICAL SKILLS

Programming:	Python
Data Analysis:	Pandas, NumPy, Exploratory Data Analysis (EDA)
Data Visualization:	Matplotlib, Seaborn, Power BI
Machine Learning:	Scikit-learn, Regression, Classification, Clustering
Deep Learning:	TensorFlow, Keras, Neural Networks, CNN
Databases:	SQL, MySQL, PostgreSQL (Basics)
Tools:	Microsoft Excel, Jupyter Notebook, Anaconda, VS Code
Version Control:	Git, GitHub

PROJECTS

Automated Data Cleaning & Preprocessing Studio
GitHub | Live App
Toolkit: Python, Streamlit, Pandas, NumPy, Scikit-learn, Matplotlib

- Engineered an automated data audit and cleaning pipeline deployed as an interactive Streamlit web application.
- Implemented intelligent missing value imputation (median/mode), duplicate elimination, and robust IQR outlier detection.
- Built real-time before/after data validation analytics and dynamic CSV/Excel export functionality for processed tabular datasets.

Exploratory Data Analysis (EDA) & Analytics Dashboard
GitHub | Live App
Toolkit: Python, Streamlit, Plotly, Pandas, NumPy, Seaborn, Matplotlib

- Developed an interactive visual analytics dashboard featuring dynamic demographic filters, KPI metrics, and cohort tracking.
- Created advanced statistical distributions using Plotly (KDE histograms, boxplots, OLS regression trendlines, and correlation matrices).
- Automated data storytelling to extract key performance drivers and enabled custom export of filtered datasets and summary reports.

Student Management System
GitHub
Toolkit: Python, SQLite3, Tkinter, PIL (Pillow)

- Developed a desktop database management application featuring multi-role authentication (Admin and Student portals) and interactive Tkinter GUI.
- Implemented robust CRUD operations, unique student ID validation, secure password authentication, and profile image storage using SQLite.
- Designed an automated digital student ID card generator displaying student metadata and dynamic profile picture rendering.

INTERNSHIP / TRAINING

Full Stack Data Science Intern / Trainee — **PythonSoft LLP | 2026**

Focus: Python Data Ecosystem, Relational Databases (SQL), Advanced EDA & Supervised ML

- Executed complete Data Science pipelines using Python, Pandas, and NumPy for automated data manipulation, feature extraction, and tabular cleaning.
- Authored complex SQL queries for relational data extraction, aggregation, and designed interactive business intelligence dashboards using Power BI.
- Trained, evaluated, and validated predictive Machine Learning models with Scikit-learn, adhering to version control and deployment standards on Git/GitHub.

Data Science Virtual Intern — **IncodeVision (Virtual) | 2026**

Focus: Automated Preprocessing Pipelines, Exploratory Data Analytics & Cloud Deployment

- Developed and deployed production-grade automated data cleaning pipelines and audit tools on Streamlit Cloud for universal tabular dataset processing.
- Conducted in-depth Exploratory Data Analysis (EDA) on student performance data, uncovering statistical correlations, demographic trends, and predictive drivers.
- Created interactive visual analytical interfaces using Plotly, Matplotlib, and Seaborn to communicate actionable data-driven insights effectively.

CERTIFICATIONS

Full Stack Data Science – PythonSoft llp (pythonsoft.org) – 2026 — View Certificate

Introduction to Large Language Models – Google Cloud (Simplilearn) – 2026 — View Certificate

Encoder-Decoder Architecture – Google Cloud (Simplilearn) – 2026 — View Certificate

Introduction to Generative AI – Google Cloud (Coursera) – 2025 — Verify Credential

ACHIEVEMENTS

- Developed and deployed 5+ data science, data analysis projects.
- Maintained active version control with 40+ contributions on GitHub across personal and open-source repositories.
- Earned 4+ industry-recognized certifications in Data Science, Generative AI, and LLMs.

SOFT SKILLS

Analytical Problem Solving | Data-Driven Decision Making | Quantitative Reasoning | Technical Communication & Reporting | Cross-Functional Collaboration | Time Management & Prioritization | Continuous Learning & Adaptability

LANGUAGES

English: Professional Working Proficiency | **Hindi:** Conversational Proficiency | **Odia:** Native / Full Professional Proficiency

INTERESTS & FOCUS AREAS

Exploratory Data Analysis & Data Storytelling | Applied Machine Learning & Predictive Modeling | Business Intelligence & KPI Dashboard Design | Open-Source Collaboration | Generative AI & Applied LLMs
